

Table \_\_\_\_  
**Basis for Interpretation of Groundwater Contamination Extent**  
**Portland Harbor Sediment RI/FS**

Site Name	Author of Impacted Groundwater Extent Estimate	Date of Assessment	Contaminant Type	Minimum Isoconcentration Contour	Comments	References
Willbridge Terminals (WMCSR-NWR-94-06)	Delta Environmental Consultants, Inc.	8/19/2004	Petroleum Related VOCs	MDL	Generally, the petroleum constituents in groundwater plume has been defined on the upland portion of the Willbridge Terminals.	Willbridge RI Report (2002)
			Petroleum Related PAHs	MDL	Preferential migration pathways to the east are present, and have been or will be addressed with interim remedial action measures.	Willbridge RI Report (2002)

Notes:  
MDL: method detection limit  
ug/L: micrograms per liter  
SVOC: semivolatile organic compound
